# SESSION 2

## 5. Which renewable energy sources have the greatest potential for development in Kazakhstan?

[More Details](#)

■ High ■ Medium ■ Low ■ None

# SESSION 2

## 6. Is enough being done in Kazakhstan's mining industry to achieve carbon neutrality in 2060?

[More Details](#)

● Yes	1
● No	4
● Yes, but not in all areas	1
● Hard to say	1

# SESSION 2

## 7. What are the priority steps to take to achieve carbon neutrality in the mining industry?

[More Details](#)

■ Critical ■ Important ■ Low priority ■ Not important

- Inventory and monitoring of greenhouse gas emissions.
- Development of a certification system for low-carbon products.
- Using carbon credits to offset greenhouse gas emissions.
- Reducing the use of coal and building renewable energy power plants.
- Switching to more environmentally friendly mining methods, such as in-situ leaching.
- Tightening energy regulations for mining operations.
- Introduction of carbon capture and storage technologies.
- Investing in the development of new technologies to reduce emissions.
- Aligning investment plans with climate goals and monitoring progress.
- Creation of competence centres for the decarbonisation of the mining industry.
- All of the above
